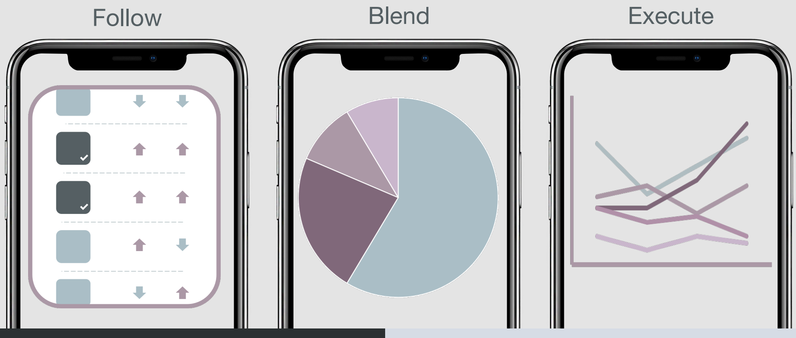
Stardust

Hi there!

We're Stardust! We're a new start-up that is looking to disrupt the old model of wealth management allowing people to follow their favorite influencers, (just like you). We take these influencers then use some complex math to build a blended strategy just for them.

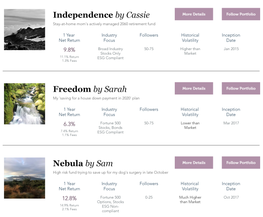


What's our goal?

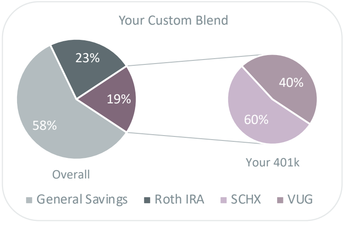
With your help, we are empowering everyone to achieve their financial goals.

By combining influencers like yourself with the latest technology, we are building an easier, more familiar way to save and invest for the next generation.

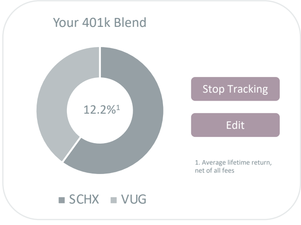
More details on how it works:



Find and follow influencers (you) who share similar goals



Stardust then blends their strategies and delivers a tailored solution



And then implements it so no one has to worry about it

Why should you care?

Reach New Followers

Our search algorithm lets people easily discover you, helping grow your reach and personal brand

Monetize Your Base

It's important to us to reward everyone on our platform, which is why we allow you to set your own small fee in order to be followed

Build a Community

Help build up your community by contributing your knowledge to your peers trying to take control back from Wall Street

Transparent & Secure

We will allow others to see the relative composition of your portfolio as a percentage, but our encrypted backend will make sure they never see the actual amount

We'd love for you to be a part of out pilot program!

Our Roadmap

Ideation

I already had people following my 401k, but why wasn't there a company that made it easy

1

2

Website Test

We built a website to see if people were receptive to our plan

3

Marketing Test

It was a huge success, our website had 50x the marketing effectiveness of the big wealth managers

4

Today

Backend Development

We jumped straight into backend development for Stardust. We have our encrypted MVP and are moving onto our frontend mobile app

5

Mobile App

We're building an iOS app to make it easy to share and follow financial influencers like you

6

Integration & Testing

We'll make sure our app is up to the highest standards and working seamlessly

7

September

Pilot Rollout

We want your feedback on what features would best benefit your needs, we'll also send you an early build so you can check us out and be part of our platform at launch.

Drop us an Instagram DM, a Reddit Chat, an e-mail, we'd love to hear from you!
